

HEALTHY FUTURE 4 YOU & THE PLANET

Climate change and nutrition are closely linked because food production has a direct and indirect impact on the climate. In youth education, it is important to highlight this link, because our eating habits have a major impact on the climate.

HEALTHY FUTURE raises young people's awareness of nutrition patterns and their impact on the climate. The project aims to provide young people with the skills they need to lead an appropriate lifestyle. They should become aware of the effects of food and its production on their health and the climate and develop a sustainable attitude towards environmental and nutritional issues.

For this purpose **HEALTHY FUTURE** collects materials on a platform: www.healthyfuture.eu to provide access to information and successful approaches that qualify young people as well as youth workers to make responsible decisions about climate-impacting measures.

HEALTHY FUTURE is aimed at young people, youth workers and teachers, but also at advisors of young refugees who also need climate, environmental and nutrition education.

The **HEALTHY FUTURE** partnership consists of four qualified European education providers:

→ Kultur und Arbeit e.V., Bad Mergentheim / Germany www.kultur-und-arbeit.de

→ Wissenschaftsinitiative Niederösterreich, Würnitz / Austria www.wissenschaftsinitiative.at

→ ZAVOD GEA, Šoštanj / Slovenia www.zavodgea.com

→ QUALED obcianske zdruzenie pre kvalifikáciu a vdelávanje, Žilina / Slovakia www.qualed.net
